

# Internal Resistance of Battery

Step 1: Draw in your data points from the graph you were given in the program..

Step 2: Circle the two points that you will be using to find your slope and then show the calculation for finding slope.

Step 3: Show your calculation for finding the y-intercept of your graph.

Step 4: Show your calculation for finding the x-intercept for your graph. Enter your answers into your program to check that you did everything properly
