

Triangle Problems

Step 1: Below is a picture of your first triangle. This triangle will not be drawn to scale. Fill in your hypotenuse and your angle and then neatly show your work to solve for your two legs. Enter your answers into the program to check that you did everything correctly.

Step 2: Below is a picture of your second triangle. This triangle will not be drawn to scale. Fill in your two legs and then neatly show your work to solve for hypotenuse and angle. Enter your answers into the program to check that you did everything correctly.

Step 3: If you need to write things down, use the space below to solve for the unknowns in your other three triangles. If not, don't worry about putting anything in the space below.
