

Newton's Law Simple

Step 1: Draw in all the parameters for your problem into the picture below.

Step 2: Use Newton's 2nd Law of motion to solve for the unknown values in your problem. Show all your work in the space below. Enter your answers into the program to make sure you did everything correctly

Step 3: What are some other forces that are acting on the block and why did we not need to consider them when we were solving our problem?
